Exploration

Advanced Open Water Diver

Are you ready to move beyond Open Water? To what depths do you want to take your adventure? No matter what your goal, Underwater Dive Center's Advanced Open Water Diver course gives you the confidence, skills and experience for a whole new level of underwater exploration. And no, you don't have to be "advanced" to take it. This class works for both the new diver and the experienced diver. As you step beyond the Open Water diver level, you will do five dives over two days and have the opportunity to explore new areas of diving. Plus, the Advanced Course takes you one step closer to Master Scuba Diver - the ultimate recreational diving rating.

How Our Advanced Open Water Courses Work:

You will complete five dives during one weekend. Two of the five dives will be a deep dive and a navigation dive. We begin our Advanced courses with a single class session. During the class, you will be introduced to new areas and choose three other specialty dives. During the class you will learn in detail about the dives you have chosen. These new areas may include Night diving, Search & Recovery, Buoyancy, and much more.

What You Learn:

- Practical aspects & the physiological effects of deep diving.
- More ways to use your compass & how to navigate using kick cycles, visual landmarks and time.
- How to better use your dive computer & RDP.
- Much, much more depending on what other dives you and your class pick.

Excitement

Emergency First Responder (EFR)

Underwater Dive Center's EFR course allows you to learn about serious medical emergency response skills in a positive environment. These skills can not only be used during diving emergencies, but they can also be used in everyday life.

How Our EFR Courses Work:

This 8 hour course is broken up into two sessions: lecture / video and application. During the application session you will have hands on training for each skill. Upon completion, you will have the confidence that you are prepared to help in any emergency. CPR and Medic First Aid is a prerequisite for the Rescue Diver Course.

Emergency Oxygen Provider

For recreational scuba divers, oxygen is the primary first aid given to individuals suffering from a near drowning or decompression illness. Having oxygen

readily available at dive locations has become a standard practice for divers. Along with the availability, first responders must know how to provide oxygen in an emergency. This course is highly recommended if you are taking our Rescue Diver Course.

How Our Oxygen Provider Courses Work:

During this four hour course, you will go over how an oxygen kit is set up and how to administer oxygen in the unlikely event an accident should occur. We teach this course as a totally hands on course. This means you actually administer oxygen from a real oxygen kit.

Experiences

Rescue Diver

"Challenging and rewarding" best describes Underwater Dive Center's Rescue Diver program. This course expands your knowledge and experience level. Rescue Divers learn to look both inside and beyond themselves. You will learn to consider the safety and well being of other divers. Although this course is challenging, it is a rewarding way to build your confidence. Rescue Diver training prepares you to recognize problems, how to prevent them and, if necessary, manage dive emergencies. We believe that the best rescue is the one you do not have to do at all. Because of this our course emphasizes awareness and prevention.

How Our Rescue Diver Courses Work:

This course is designed to be completed over one weekend. There will be two class sessions, one pool session and one day of open water scenarios.

What You Learn:

- How to anticipate, prevent and manage potential dive accidents.
- Self Rescue.
- Recognizing & managing stress in divers.
- Assisting tired divers.
- Rescuing panicked divers.
- Rescuing unresponsive divers.
- Emergency management and equipment.

Advanced thru Rescue Diver Package

The Advanced thru Rescue Diver package will take you from being an entry level diver to a well trained, confident diver. We have combined all 4 classes together to save you money. The package includes: PADI Advanced Open Water, Emergency First Responder, Emergency Oxygen Provider, and Rescue Diver Courses, All Manuals, Materials, Lectures, Pool Sessions and 4 Certifications.
